What Are We!!

Ajeevi Technologies Private Limited is started its business activities in the financial year 2016-17 with the mission to promote cities that provide core infrastructure and give a decent quality of life to its citizens, a clean and sustainable environment and application of 'Smart' Solutions.

What is School ERP?

A School Enterprise Resource Planning Software is a set of programme, specially designed to manage all the administrative tasks of school in a effective manner. Also School ERP Software can handle all those tedious task which earlier had to be taken care by a specific person with the use of pen and paper.

School in a Box

- **Integrated system - no need for managing multiple platforms**
- **No data duplication in different systems**
- **Longevity and Durability**
- **Easier access - Credentials works across departments**

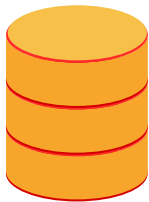

Student Information Management System Features

Reduce Paper Work

Save Paper and Go Green with the student management system, store the documents and files in digital format. Enhance the safety & security of the institute data as an unauthorized individual can not access it.

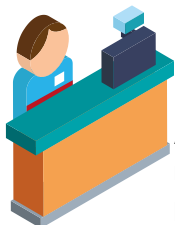

Student Data Management

Manage all type of data, such as students personal details, academic progress, documents, attendance details more. Admin can easily export the data anytime and make a data-driven decision.

Report Generation

Generate various comprehensive reports - attendance report, fees pending report, placement report, examination result report, and more. Also, customize and modify the field according to the institute preference.

Admission/Registration Management

Automate the whole admission process, reduce the possibility of errors and paperwork. Efficiently manage student and parents details, customize the admission form, document management, and more.

Online Fees Payment

No more standing in the long queue for the fees submission. With Fedena, automate transactions, send instant alerts to parents/students on pending fees, add taxes and discounts according to your institute requirement.

Student Progress Tracking

Single platform to keep a track on students' day to day activities like academic progress, daily attendance, subject-wise performance, assignment submission, and more.

Transport Management

Real-time tracking on vehicle routing and stops with GPS integration. Manage and schedule the transport fees collection. Also, ensure better safety and security of the students.

Attendance Management

Automate attendance tracking with biometric/RFID integration. Mark attendance subject-wise or day-wise, send an instant alert to parents and let them stay abreast in case their child missed any classes.

Student Information Management System Features

Examination Management

Automates the examination process, schedule the various type of examination. Send a notification or instant alerts via the messaging system and instantly share the examination results with students and parents.

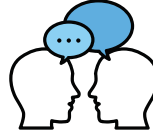

Hostel Management

Effectively manage the room allocation, collect and manage the hotel fees, provide bird's eye view on of all existing hostels on the campus, enhance the student's security, share access to the detailed records.

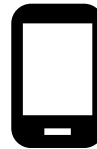

Library Management

With barcode scan functionality track the book's availability. Perform anti-theft operations & identification at the same time. Classify the books subject-wise, automatically calculate fine in case of late submission.

Communication System

Improve communication among parents teachers and students by integrating SMS and email platform. Send instant alerts and customize the messaging according to the target user.

Mobile App

Single platform to keep a track on students' day to day activities like academic progress, daily attendance, subject-wise performance, assignment submission, and more.

Alumni Management

Let students build a strong relationship with the alumni via SMS or email platform. Allows alumni to share their knowledge and experience to the student so that they can prepare themselves for the upcoming challenges.
