

Introduction

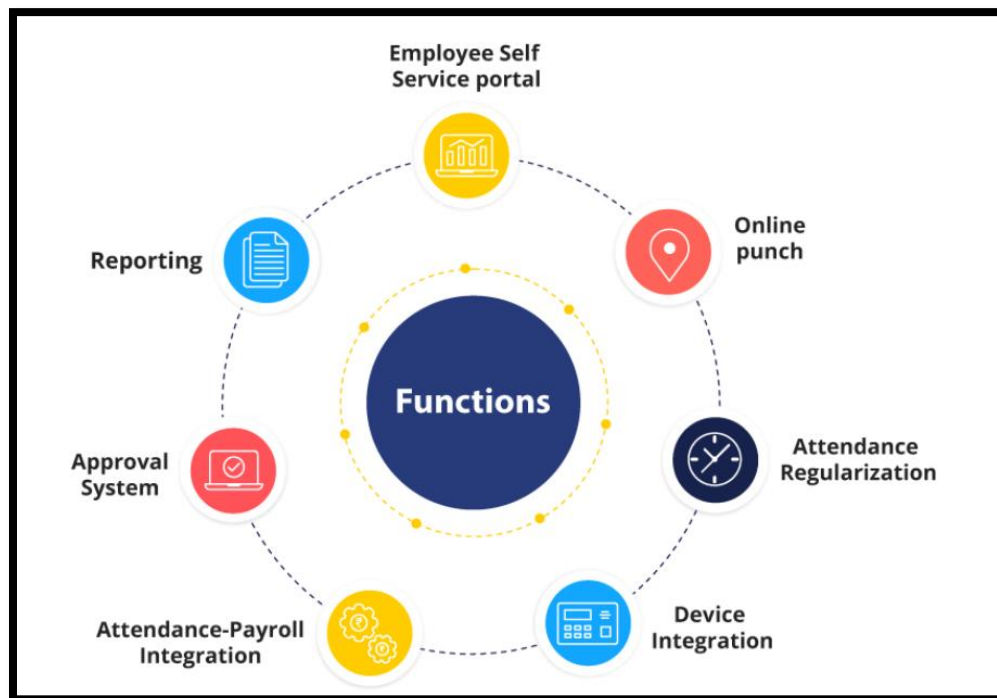

Time and attendance systems are crucial components of for any business. Ajeevi attendance management software is an intelligent solution that provides real time attendance monitoring and automated inputs for other HR functions like Payroll processing, Leave Management, Expense and Reimbursements etc. The software can be deployed on both cloud and on-premise. The software can be used for Adhaar-based attendance solutions as well.

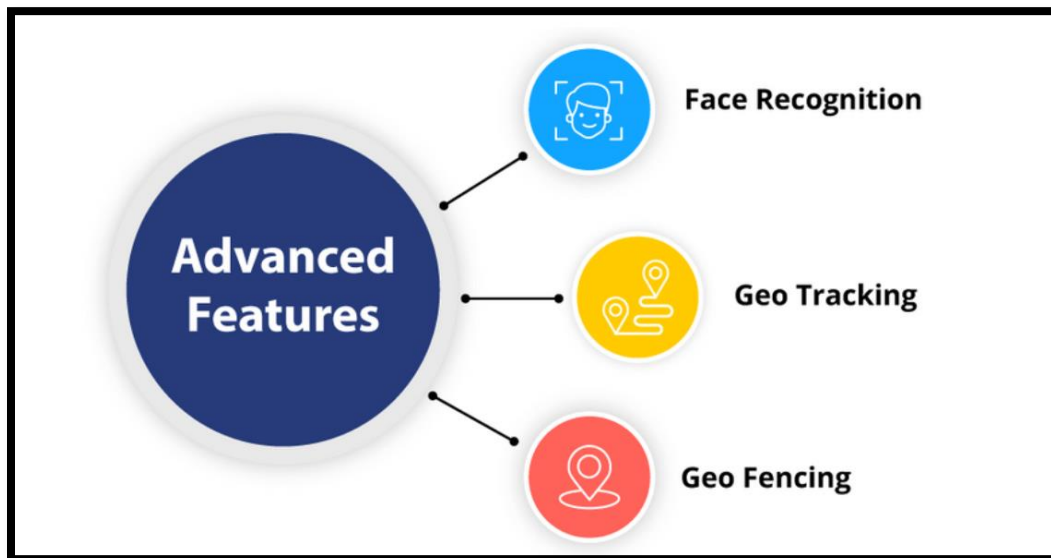

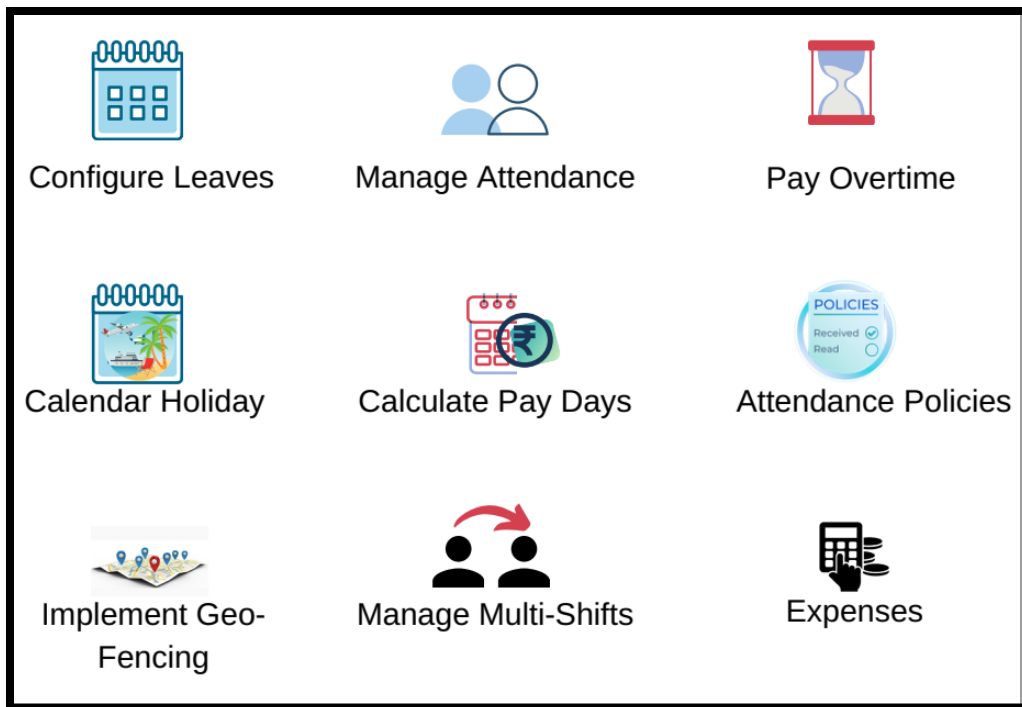

Uses

The software can be used in organizations of all levels working in any domain, including smart cities. It can be implemented on per-user model (deployed on Ajeevi cloud or any other cloud) or as perpetual software deployed at client's premises.

Features

- Manages attendance of employees / workers
- Provides automated data for Leave management module
- Provides automated data for Payroll processing module
- Can be customized to implement Attendance & Time policy of organization
- Can be used in multi-shifts based working
- Can implement attendance monitoring using Geo-Tracking and Geo-fencing features
- Can be integrated with biometric devices at field level (including fingerprint, face recognition, iris scanner, smart cards etc.)
