Other Features Of One City APP & Website

App Development Flow

Website Development Flow

We Manage Application portfolio & Website smarter with security and confidence

Efficiency and cost

DevSecOps and Quality Engineering enable incident resolution closer to the source; cognitive problem management offers advanced analytics for root cause analysis; and extreme automation for self-heal keeps workers steady.

Speed and agility

Short release cycles are aligned with business outcomes for improved time-to-value; offers aggressive, integrated service level agreements.

Availability and resilience

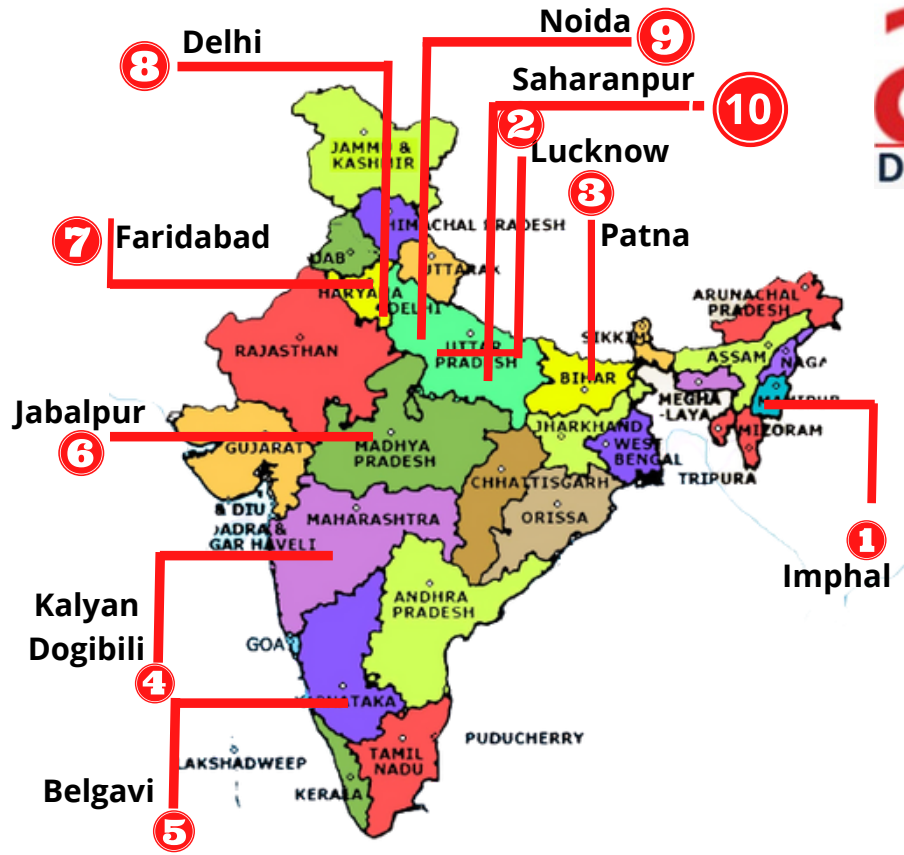

Site Reliability Engineering provides resilience by design with application maintenance and enhancements; potential for no planned downtime with canary deployments and rolling updates.

Security and reliability

Emerging security threat models with effective governance, risk and compliance; provides Open Source for Enterprise for improved governance and management of open source.
